PieCut

Discover our innovative marking template –
the easy way to create your own exhaust "pie cuts".

Pie cuts are a real eye-catcher when building exhaust systems and are often admired
for their craftsmanship.

With our template, you can now create them effortlessly yourself.

How it works:

Simply slide the template onto the pipe, mark the cut lines, cut, and weld. Done!

Our templates come with two angles: 9° and 18° – both are included.

This gives you the flexibility to create pie cuts exactly the way you want them.

They're durable and made from high-quality PETG material.

Thanks to advanced 3D printing technology, we ensure a perfect fit and top-tier quality.

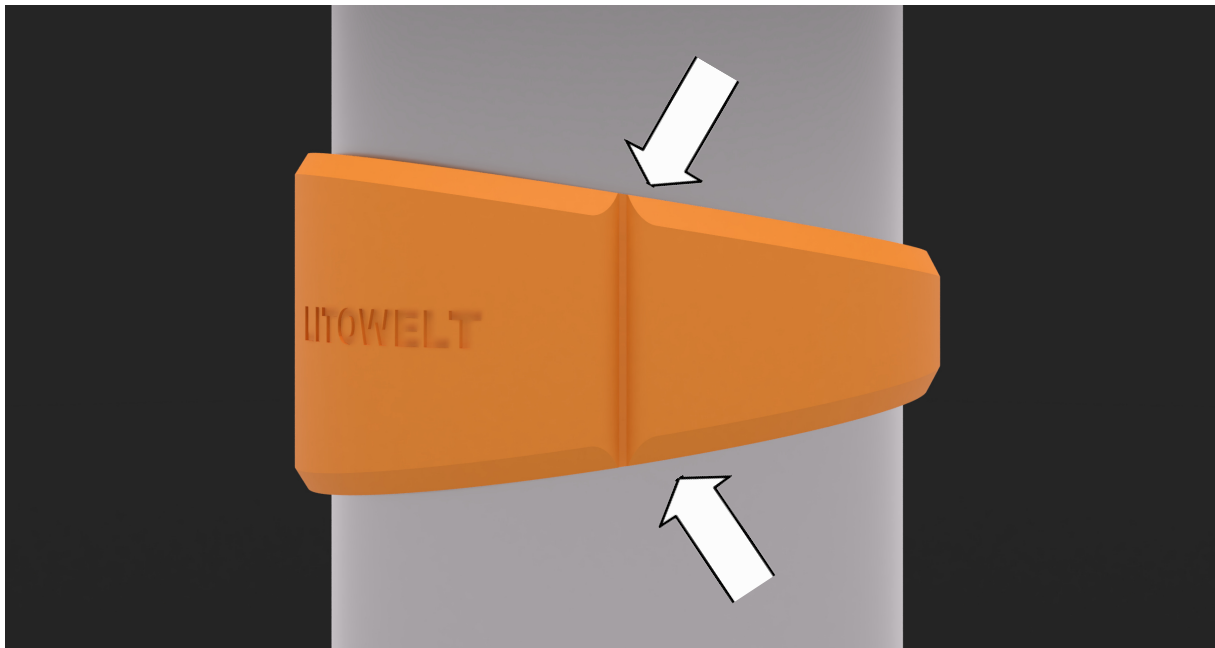

Need a different size? No problem!

Just get in touch, and we'll find a solution that fits your needs.

Oh, and by the way – the images you see here are renderings from our CAD software.

The actual product may vary slightly, but trust us, it's just as awesome! :)

Usage

- 1. Slide the template onto the pipe**
- 2. Mark the pipe along the edges of the template**
- 3. Cut along the line – done!**
